Coordinator of educational programs of the Center for Urban History. Develops different formats of educational projects, such as supporting programs at the fair, city games, movies, family Sundays, classes for children, pupils of all ages and students on the basis of visual materials, exhibitions and research projects of the Center for Urban History.

Organizers:
Charity foundation "The Depths of Arts" (Kyiv), Centre for Urban History (Lviv).

With the support of:
"City Studio" – urban project, the German Society for International Cooperation, Municipal development and renewal of the old city of Lviv and Lviv City Council, the NGO "East and West together".

According to statistics, more than two thousand families moved from the occupied territories to Lviv. A large number of children and youth occurred to be in a new city, in other circumstances and environment. This aspect is crucial, as concerns one of the most vulnerable categories – children and youth.

The purpose of the educational program "DONKULT" was in solving the problem of adaptation and understanding, offering young people the opportunities for development and implementation.
An educational program for children and teenagers was presented by project "Your / My stories", centered around the theme of the city: urban stories and legends, looking for new ideas to create a comfortable and friendly urban environment. The main purpose of activities designed for different age groups of children was creating spaces where children and youth could in a funny way share personal experiences, telling stories of their cities.

**Program events:**

- The little visitors of the Forum took part in the creation of animated social video "City in my hands", the process consisted of four workshops and presentations of teamwork.

- Historical school-workshop on ancient and modern history of the city - "Donbas history voice of children"- opened its door for teens who had recently moved to Lviv.

- Parents, educators and teachers were invited to a "Meeting for coffee: how to talk to children about difficult topics" for joint discussion of ways and conversation formats with children and teenagers to "Non children" themes: war, conflict and trauma.
During the Forum, **Kharkiv artist Roman Minin** (a native of Donbas), who recently implements social projects in public space, worked with children on painting of the front wall of children's library of the city. The authors and performers of the project were more than 20 children aged 8 – 12 years old of Donbas and Lviv.
During the Forum, we conducted the poll. Each event was accompanied by audience questioning. This made it possible to collect the information on the number of visitors, age and social groups, find out which events were more relevant and interesting for a particular age group, to identify the most effective channels of informing about the "DONKULT" events. The processed statistical data will be taken into account when planning the next Forum.

Volunteers of Cultural Forum "DONKULT" were 20 members of the National Scout Organization of Ukraine "Plast" aged 15 – 17 years. They were active partisipants of the events management, distributed information about the Forum, handed out flyers and programs, were responsible for conducting of survey of the "DONKULT" visitors. Volunteers had the opportunity to talk with peers participating of theater programs who came from Mykolaivka (Donetsk region), resulting in teenagers found a lot in common and made friends.
Now, the Fund team is actively working with activists from Galicia, in order to the next Forum present this region in the East of the country, namely in Kharkiv.

The Fund aims to continue carrying out the forums on specific regions of Ukraine, showing "The Depths of Arts" in the regions opposite to each other – Galicia in Kharkiv, Sloboda Ukraine in Uzhgorod, Transcarpathia in Odessa, Odesa region in Chernihiv and so on.
